

Technology Integration Group and E&I recognize how Chromebooks are revolutionizing the classroom; this encouraged us to create a dedicated group called the **Chromebooks in the Classroom Team**.

The **Chromebooks in the Classroom Team** affordability, manageability, and rich educational content make it the ideal solution for all school districts.

In order to save school IT staff countless man-hours, we have developed a turnkey solution that puts Chromebooks into the hands of your students in a ready-to-use state and gives you the means to manage them easily.

The **Chromebooks in the Classroom Team** is certified to sell and service all of the major Chromebook manufacturers. As a certified Google Partner, the **Chromebooks in the Classroom Team** can provide school districts with the Google Chrome Management Licenses.

Our white glove enrollment service includes updating the Chrome OS, network configuration, and enterprise enrollment of the systems into the Google Management Console.

After the white glove enrollment service is completed, TIG will perform an inside delivery to ensure your systems are delivered in a ready-to-use state.

*Don't waste time
that could be devoted
to education.*
